

Design time only; no patient rows; not an estimator

1 Design time

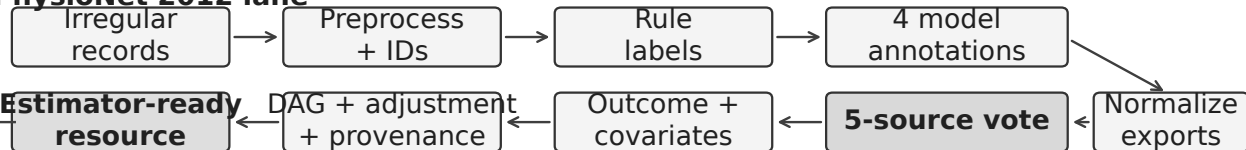

2 Construction: independent dataset lanes

Gates per lane: schema/ID | prediction export voter/cohort | output/provenance

MIMIC-III lane

PhysioNet 2012 lane

3 Downstream characterization

Shared method interface; separate execution and results
CausalForestDML | LinearDML | CausalIPFN | matching
sensitivity / permutations | outcome downsampling

Resources are not pooled; similarly named proxies retain source-specific meaning.
